

fo

TO THE PUBLIC.

When this, the authorized Souvenir was first contemplated, it was the intention of the Publisher to include Brandon, Calgary, Carberry, Carman, Dauphin, Edmonton, Lethbridge, Medicine Hat, Minnedosa, Moose Jaw, Morden, Neepawa, Prince Albert, Regina, Selkirk, Strathcona, and many other towns. That the towns named are not included in the work is wholly due to many difficulties that could not be foreseen. Many half-tone cuts that it was understood could be procured for the production could not be secured. This was not known until too late to send an artist to take new views. As we are under contract with the Exhibition Association to produce Souvenirs for the years 1904 and 1905, the work on the 1905 production will be taken up at once, and will contain entirely new half-tones and produced in a manner worthy of patronage.

THOMAS BELL,
Publisher

Winnipeg, Man., July 25, 1904.

VISITORS

TO THE EXHIBITION

will have an opportunity of witnessing for themselves the marvellous growth of Winnipeg and of judging of its merits as a field for investment. Occupying, as it does, the same position to the Canadian West as Chicago does to the American West, it is safe to predict that within a decade Winnipeg will be the largest city in the Dominion. Values are still low in comparison with prices of property in other cities without the advantages that Winnipeg enjoys; therefore our advice is to

The Eastern and Western Land Corporation, Limited

THE EASTERN AND WESTERN LAND CORPORATION, LIMITED, have 125,000 acres of the very best agricultural lands in Western Canada. These lands are in the now famous QUILL PLAINS, District of Saskatchewan, and were selected some years ago by the most competent land inspectors.

The soil consists of rich black loam, of a depth of two feet, with a clay subsoil. Water, apart from the streams, can invariably be found at from ten to twenty feet, and there is sufficient timber for all the settlers' necessities. The luxuriant grass which grows on the prairies of the Quill Plains is the finest in the world and makes this district a paradise for stock.

The best of railway facilities, good markets, schools and churches, and a healthy and invigorating climate offers to the settler a prosperous living and a happy home.

SOME FACTS ABOUT WESTERN CANADA

1. Grand soil. 2. Good crops 3. Grand climate. 4. Cheap lands.
5. Good markets. 6. Good churches and schools. 7. Good water.
8. Good railway facilities. 9. Contentment and prosperity.
10. One crop often pays for the land and improvements.
11. Western Canada is bound to become the greatest wheat producing country in the world.
12. It has a soil specially adapted to the growing of wheat.
13. The climate matures the plant rapidly. 14. The wheat never rusts.
15. There are no insects to destroy the grain.
16. There are no noxious weeds to hinder its growth.
17. Canadian No. 1 Hard is the standard of the world.
18. CANADA, THE GRANARY OF THE WORLD.

Hams, Bacon and Pure Lard, and in fact everything connected with the hog product bearing our label is a guarantee for the choicest quality of goods.

Gordon, Ironside & Fares Co., Ltd.

1880—We established the first Pork Packing business in the West. Dressed hogs only were handled. No refrigeration or cold storage was used. Hog products and Butter, Eggs and Cheese were all handled in an ordinary warehouse.

1886—We erected the pioneer pork packing plant of the West; daily capacity, 250 hogs. Ice was first used for chilling and storage rooms.

1898—Doubled our plant, making the daily capacity 500 hogs. Installed mechanical refrigeration for Chill Rooms and Butter, Egg and Cheese Rooms. Established branches at Vancouver and Nelson, B. C.

1902—Again enlarged our plant, making the daily capacity 1,000 hogs. Discontinued the use of ice. Extended the mechanical refrigeration system throughout all our store rooms.

1904—Established a branch at Calgary, Alta., and are still setting the pace in the progressive West.

You can't afford to be without it.*

BLUE RIBBON DEPT. S

WINNIPEG

THE CITY OF WINNIPEG

GEOGRAPHICAL POSITION.

THE City of Winnipeg is situated at the junction of the Red and Assiniboin Rivers in the Province of Manitoba; it is almost midway between the Atlantic and Pacific oceans and forty miles south of Lake Winnipeg, an immense body of water abounding in fish, with shores for the most part heavily timbered; it is sixty miles north of the boundary line between Canada and the United States of America, with which latter country it has three direct connecting lines of railway.

CLIMATE.

The climate is very agreeable. Spring commences about the first of April and has scarcely put in an appearance before it is followed by summer, the delights of which, with its long days

and cool nights, it is impossible to describe. Autumn is a splendid season; and winter entirely loses its dread for the timorous after a single experience.

POPULATION.

In 1870 the population was 215; in 1874 it had risen to 1,869, in 1885 to 19,574, in 1898 to 39,384; on the 1st October, 1902, it was 56,603, and to-day it is 77,000 souls. The great inrush from the East accounts for the latter figures. The figures above given are from official records and are very conservative.

Upper Port Garry--The Winnipeg of 1870.

The Original Inhabitants.

Winnipeg Beach, Lake Winnipeg

MUNICIPAL GOVERNMENT.

MAYOR AND COUNCIL

The government of the City is executed under the powers of a Charter from the Provincial Legislature; it is carried on by a Council composed of twelve Aldermen elected by the people, with a Mayor as Chief Magistrate. Each Alderman holds office for two years, the Mayor for one, and all must following are the names of the Mayor years 1903 and 1904: 1903—Mayor, Campbell, J. C. Gibson, Robert Barclay, Latimer, T. Sharpe, J. G. Harvey, D. D. Cockburn. 1904—Mayor, Thos. Sharpe, Gibson, John Russell, J. R. Wynne, Harvey, D. D. Wood, A. McCharles, Henry officials are appointed by the Council, and removals are made for the public

The water supply of the City is artesian well; it is exceptionally pure

Fire Protection.—Winnipeg is Fire Brigade is composed of forty-four hose wagons, four steam fire engines, a sixty-five ft. Hayes aerial truck. There and four are in course of erection. There ample supply of water. Fire limits are of brick and stone may be erected, others dations may be placed. All electrical Electrician, and all buildings erected un-

Municipal Ownership.—The City asphalt plant and a stone quarry. The Electric Lighting plant installed at a cost of 70 miles of wire, and costs \$83.98 distinction of being the first City in America to own its own asphalt plant.

Pavements, Stone Walks and Boulevards.—The streets are all laid under the direction of the City Engineer by day labor and the

MAYOR THOS. SHARPE

be substantial property owners. The and members of the Council for the John Arbuthnot, and Aldermen C. J. H. McCarthy, John Russell, J. G. Wood, D. A. Ritchie, J. L. Wells, J. W. and Aldermen C. Campbell, J. C. J. W. Horne, J. G. Latimer, J. G. Har-Fry, J. W. Cockburn, F. J. C. Cox. All no office is elective, and all appointments good.

of immense capacity obtained from an and is supplied at the lowest possible cost, well equipped with fire protection; the men; it has twenty-four horses, three two double and one single chemicals and are three fire stations at present in use are ninety-three fire alarm boxes and an established within which only buildings wherein only those having stone foun-appliances are installed under the City der like control of Building Inspector. owns its own street lighting plant, an street lighting is provided by the City of \$62,673.48; it has involved the string-per lamp per year. Winnipeg enjoys the

CITY HALL AND VOLUNTEERS' MONUMENT

cheapness with which the stone can be obtained from the City's quarry makes the cost of pavements comparatively low; in fact, of forty-four cities of America Winnipeg lays its asphalt pavements at the lowest cost. Artificial stone walks are universally used in the more thickly populated districts. Boulevards are upon most of the streets.

EDUCATION.

The school system of Winnipeg is governed by statute. The system is as perfect as thought and care can make it. But little expense is upon the parents of scholars, none indeed for education, and the text books for the preliminary grades are free and thereafter only small amounts are required for necessary books. The school buildings are noble in design, complete in detail, including sanitary conditions, and as a whole compare favorably with any in the Dominion. Included in the system is a Collegiate Institute forming a link between the lower schools and the University. Education in this department is entirely free. Four existing colleges are affiliated with the present University and a most complete University building has been erected. There is also a well equipped Medical College in connection with the University. Besides the public schools there are several private educational establishments.

CHURCHES.

Instead of enumerating the different denominations of the Christian religion a difficult task

Arrival of first C.P.R. Train in Winnipeg by Red River Steamer

Seven Oaks Monument—Site of a clash between old rival Fur Companies

would be set to point to one which is not represented in Winnipeg.

PUBLIC LIBRARY.

A Reference and Circulating Library is maintained by the City in the City Hall. It contains over 15,000 well selected volumes. A reading room is attached to the Library which is entirely free to the public, who have access to forty-four monthly and thirty-five daily and weekly newspapers and periodicals from England, the United States and Canada. A fine new public Library building is now under construction, towards which Mr. Carnegie is giving \$75,000.

MAIN STREET LOOKING NORTH FROM PORTAGE AVENUE

Volunteers' Monument, City Hall Square

TRADE AND COMMERCE.

DOMESTIC TRADE

Winnipeg is the centre for the wholesale and jobbing trade of the North-West. Immense stocks of goods and merchandise required to supply the wants of the districts devoted to grain production, stock raising and cattle breeding, mining, lumbering and fishing, as well as the more diversified demands of the city, town and village, are to be found in the handsome warehouses supplied with the latest conveniences and appliances, which are a marked feature of the City's architecture. Shipments are made daily to points over a thousand miles distant, so extensive a range of country is supplied from this well stocked central market. The very complete railway systems radiating from Winnipeg afford great facilities to the retailer in the Province and Territories for securing his goods at short notice. It would be impossible to give in detail a full list of the lines of goods handled, it will be sufficient to make the general statement that all the wants of a mixed community are supplied.

FOREIGN TRADE

The direct foreign trade of the Port of Winnipeg in the matter of imports in 1897 totalled \$2,858,966 and in 1899 \$5,695,715, though a large percentage of the foreign goods consumed in the City and Province is purchased duty paid in Montreal and Toronto, and is not credited to the Port of Winnipeg in the Customs House returns.

CUSTOMS DUTIES

The customs duty paid in 1899 was \$1,140,051. Returns for 1902 are not available, but the increase is in proportion to the increased trade as indicated by the above quoted data.

MANUFACTURES.

Various industries are already established in Winnipeg, including furniture and upholstery, brooms and brushes, oatmeal, flour and grist mills, awnings, tents and mattresses, clothing,

NEW UNION BANK BUILDING

MERCHANTS BANK BUILDING

National Trust Co. Building

most all of the leading banks of Canada. A complete system of financial organization was effected in 1893 by the formation of "The Winnipeg Clearing House Association." From one of the lowest places in regard to the figures recording the bank clearings Winnipeg has risen in a few years to third place in Canada, only Montreal and Toronto showing greater. These cities, however, show only slight increases and even decreases over last year's figures, while Winnipeg shows monthly increases of nearly fifty per cent. The following figures give the annual returns of the bank clearings in Winnipeg for the past ten years:—1894, \$50,540,648; 1895, \$56,873,631; 1896, \$64,146,438; 1897, \$84,435,832; 1898, \$90,674,325; 1899, \$107,786,814; 1900, \$106,956,720; 1901, \$134,199,438; 1902, \$188,370,003; 1903, \$246,108,006.

LAND AND FINANCIAL COMPANIES

In addition to the banks, numerous land, loan and trust companies have been established here and the principal eastern investment and loan companies have branches in the City. Fire and life insurance companies of Canada, England and America are well represented.

bookbinding, carriage works, soda water works, breweries, meat curing and packing, bricks and tiles, boiler and machine shops, foundries, biscuit, confectionery and bakery products, coffee and spice mills, harness and saddlery, marble works, tinware, sash, door, and boxes, saw mills, cigar factories, oil mills, plumbing and gas fitting, tanneries, soap, jewellery, etc.

BANKS.

As a financial centre Winnipeg ranks third among the Cities of Canada. In the City now doing business there are no less than thirteen chartered banks representing a paid up capital of nearly fifty million dollars, and including all

perienced physicians and surgeons and are cared for by trained nurses. There is also a large and well appointed hospital managed by the Grey Nuns in St. Boniface, across the Red River from Winnipeg, and but a short distance therefrom. The medical profession is adequately represented, numbering among its members some of the most skilful in Canada. The Children's Home, The Women's Home, The Free Kindergarten and other kindred institutions, including the Deaf and Dumb Institute, provide ample accommodation and care for those in need.

Osborne Bridge, Port Rouge

The Gold Mines of the West

PUBLIC INSTITUTIONS.

The Winnipeg General Hospital is maintained for the greater part by the contributions of the City. The poor and suffering from all parts of Manitoba receive here most careful and humane treatment in large and well appointed buildings at the hands of skilful and experienced physicians and surgeons and are cared for by trained nurses. There is also a large and well appointed hospital managed by the Grey Nuns in St. Boniface, across the Red River from Winnipeg, and but a short distance therefrom. The medical profession is adequately represented, numbering among its members some of the most skilful in Canada. ASSESSMENT.

The assessment of the City for purposes of taxation was in 1874, \$2,676,018; 1885, \$22,411,005; 1898, \$27,638,620, and 1903 is \$43,963,690. Thus in three decades the increase has been \$41,287,672. The last preceding statement is all sufficient to show the growth of the city. Moreover, this advance has been steady, continued and is continuing, so that the figures given above as the assessment for 1903 are those based upon valuations in October, 1902, and the valuations of properties to-day would represent a greater increase.

THE ASSINIBOINE RIVER

INDUSTRIAL EXHIBITION.

The Winnipeg Industrial Exhibition Association holds annually the great agricultural and stock show of the western half of Canada. One hundred and forty thousand dollars is already invested by the City in buildings and improvements. In 1902 the amount expended on the Exhibition, including prizes, exceeded \$65,000 and for 1903 the estimate is \$70,000.

A Real Bucker

GRAIN MARKET.

Winnipeg is the greatest Grain Market in the British Empire. The grain inspected between September 1st, 1902, and August 31st, 1903, was: Wheat, 51,833,000 bushels; Oats, 3,054,000 bushels; Barley, 565,200 bushels; Flax, 655,000 bushels; speltz, 10,000 bushels. Total, 56,117,200 bushels. In Wheat receipts the City is now a leading point on the continent, as the following comparison shows:—Winnipeg, 51,833,000 bushels; Duluth-Superior, 42,406,923 bushels; Chicago, 37,940,953 bushels.

GENERALLY.

GOVERNMENT BUILDINGS

Winnipeg is the Provincial Capital, and in consequence the Manitoba Legislature, Department of Agriculture and Statistics, Attorney-General, Public Works, Provincial Treasurer, Provincial Secretary, with the Registrar-General of Lands and the Superior Courts, have their official headquarters within the City.

MILITARY

The regular troops on duty in Manitoba, the Canadian Mounted Rifles, are in barracks in the City, and the volunteers with headquarters here include the 13th Field Battery and the 90th Regt. Rifles.

PARKS

There are nine parks maintained by the Public Parks Board, originally costing \$100,178, but this sum does not include the cost of laying out, planting and maintenance. All are tastefully laid out and cultivated. In addition to these there are two large parks, just without the city limits not under the control of the City.

At a Western Round-up

SHADE TREES

There are planted upon the boulevards of the City over twenty miles of shade trees which are well cared for by the Public Parks Board.

NEWSPAPERS

Winnipeg has three daily newspapers and many weekly and monthly publications.

										(Nine months)

(a) These years experienced the inevitable "boom"; in 1885 values again became normal.

(b) To October, 1902, since which permits for 1127 buildings, to cost over five millions, have been issued. The same date applies to realty assessment, since which values are greatly enhanced.

The above figures of assessment are exclusive of exemption, which rose from nearly three millions in 1891 to nearly eight millions in 1903.

ST. JOHN'S CATHEDRAL

THE WINNIPEG INDUSTRIAL EXHIBITION.

A review of the institutions of Winnipeg and the Canadian West would be incomplete without a brief description of the Winnipeg Industrial Exhibition. This institution was started about a dozen years ago, when many believed that a great fair in such a sparsely settled country, with its then very limited population, was an impossibility, but, to use a phrase of the political economists, it was "a natural industry," and under the guidance of men of broad views and optimistic foresight it has grown in those dozen years not only to be a great fair measured by the third largest fair on the continent ago a prominent Torontonian looked past the successful and much-praised

The Winnipeg Industrial is so much a period of time in the West, was not always so and that it took the Fair in that position. Yet it now should succeed in Winnipeg. It had who were, in all lines of industry, about it immense stretches of the best peopled by energetic and intelligent one hand to let others know what they others what they had accomplished. the Exhibition was located where it transportation systems which centre Winnipeg. Under these circumstances of all classes, the Exhibition has gone most sanguine expectations of a few

In old-settled countries exhibiting the life of a nation. They act as to show the progress made by the the warp and woof of that nation's tries exhibitions perform this function. They show to people from a try itself, the intelligence and industry should they settle here, and they

amusement of which there are often many in older and more populous communities, but which are lacking in a country where people are separated by long distances and strenuously engaged during the whole year in the work of developing their own property and the resources of the country. In this latter regard the Winnipeg Industrial fills a place which but few other fairs occupy. The best attractions that can be presented before such a large concourse of people are got from all parts of the continent. The grand stand, which holds 12,000 people, faces the homestretch of a half-mile track where some of the finest speeding contests in the Dominion have taken place. Opposite the grand stand is the attractions platform, fitted with every appliance

PORTAGE LA PRAIRIE

THE town of Portage la Prairie is situated in the centre of Manitoba, 56 miles west of Winnipeg, and is now recognized as one of the leading centres of Western Canada; its substantial development has given it an enviable reputation among the cities of the West. The town is about 25 years old. In the early days it was a point of considerable importance as a trading centre, and when the first rush of settlement came westwards, occupied a leading position, and attracted to it a great many people.

While the town has attained considerable status as a centre, with railway and industrial importance, yet it is mainly as a centre of what is admittedly the richest agricultural district in the west that has given to it its creditable name.

In the early days before the advent of the white man, this portion of the country—that is, Portage la Prairie and the Portage Plains—was named the big Portage, as the traveller desiring to go northward had to carry or portage his pack from the Assiniboine across the prairies to Lake Manitoba, a distance of 14 miles. Municipal government was inaugurated here in 1889, when the town charter was secured.

The Town Council.—Mayor, Edward Brown; Councillors, F. G. Taylor, J. O. Cadham, J. J. Garland, D. S. Macdonald, B. S. McKenzie.

Board of Trade.—A. H. Dickens, president; F. G. Taylor, secretary.

Parliamentary Representatives.—Provincial House, Hugh Armstrong, for Portage la Prairie; E. D. Lynch, for Lakeside (Portage Plains). Dominion, W. Boyd, (Carberry). Robert Watson, senator.

Sheriff.—Hon. Daniel McLean.

Postmaster.—W. W. Miller.

Chief of Police.—D. G. McDonald.

Police Magistrate.—G. A. Marshall.

Chief of Fire Brigade.—R. Roxburgh.

Agricultural Society.—President, F. A. Brydon; secretary, W. Shepperd.

Hospital Board.—Col. Anstruther, president; W. H. Thompson, secretary.

Turf Club.—W. R. Taylor, president; Geo. Hilton, secretary.

District Registrar.—W. J. Cooper; deputy, Capt. P. Whimster.

Inspector Indian Agencies.—S. R. Marlott.

Inland Revenue Officer.—J. W. Sparling.

Customs Officer.—J. A. Marshall.

Supt. Home for Incurables.—W. P. Smith.

The legal fraternity is represented by the following firms: F. G. Taylor, D. A. McDonald, Melghien & McPherson, Anderson & Hudson, A. McLennan.

Medicai.—Drs. F. Bod, E. J. Lundy, G. E. Bayfield, W. E. Metcalfe, F. S. Keele, H. A. Gordon, S. B. Cowan.

Dentistry.—R. H. Robertson, C. H. Weagant, W. C. Kaape.

Bank Managers.—Geo. Munro, A. L. Hamilton, W. H. Thomson, E. C. Dohell.

The railway facilities are excellent. The Canadian Northern and Canadian Pacific Railways main lines run through the town, while both roads have various branches running from Portage la Prairie. Every effort is being made to have connection with the Grand Trunk when that line is built, which it will probably be, in the near future. The town has six churches and one Salvation Army Barracks.

The public schools have seen a rapid development, keeping pace with the growth of the town, and are well up to the mark in point of equipment. The school buildings are four in number, and are conveniently placed in the different wards of the town. Spacious playgrounds surround all the schools and full scope is given for that important part of child education which takes place in the campus.

The introduction of a system of waterworks in the town will be of great advantage to the schools, and the trustees will be eager to avail themselves of this system.

The Collegiate Institute.—It was a distinct step in advance when, many years ago, it was determined to establish the Portage la Prairie Collegiate Institute. From the very first there was a steady growth, but in the past few years it has been advancing by leaps and bounds. A very considerable proportion of the pupils are drawn from outward points, a hundred or more miles distant. The College staff consists of five, including the principal, Mr. George Young, and all the departments of collegiate work are well looked after.

It is not possible in a work of this kind to enumerate all the beauties of the town, nor to mention all industries. Mr. F. G. Taylor, Secretary Board of Trade, will furnish all the desired information upon application.

RAPID CITY

RAPID CITY is beautifully situated on the Little Saskatchewan River, 35 miles north of Brandon, and is surrounded by a very fertile country, and ranks third out of eighty Municipalities in the Province. It has excellent Water Power, which up to the present, has been utilized but little. It is probable that Capital will soon be interested sufficiently to make the Town a manufacturing centre. The Woollen Mill now uses water power to furnish its own motive power and light, also furnishing others. Sheep raising is proving a profitable investment, and bids fair to become an important factor. The Town is governed by a Mayor, and Council. A splendid system of drainage insures a healthy community. Typhoid and kindred fevers are unknown. Within the Town limits can be found abundance, building stone, sand and lime.

Within the Town can be found Banks, Schools, Churches of various denominations, an Opera House, Hotels, Flour Mill, General Stores, Electric Light and Power, Woollen Mill, Brick-yard, Hardware Stores, Weekly Newspaper, Furniture Dealer, Drug and Stationery Stores, Lumber Dealers, Implement Dealers, Grain Elevators, Real Estate and Insurance Agents, Photographic Supplies, Feed and Sale Stables and Blacksmiths. Also a Driving Association. Taking everything into consideration, Rapid City should make rapid strides in the progress of the Age.

SOURIS

THE Town is situated on high banks, between the Souris River and Plini Creek. It was first settled in 1880, by Capt. G. Wood, and has continued to develop a steady growth. At present its inhabitants number about 1,000. For situation, soil, water, and in many other respects it is considered superior to any, for a radius of many miles. Souris is an important Railway Junetion and Divisional point on the C.P. Ry., 24 miles south of Brandon. It has four fine Churches, School, Roller Mill with capacity for 350 barrels, seven Grain Elevators, two Chartered and one Private Bank, Planing Mill, Lumber Yard, Jewelry Store, Implement houses, General Stores, Hotels, Feed and Sale Stables, Real Estate and Insurance Agents, Fruit and Confectionery, Drug Store, Weekly Newspaper, Furniture Dealers and Undertakers. Sqnadron "C" of the Canadian Mounted Rifles is located here. The town boasts a Lacrosse Team who were the intermiediate champions in 1902.

THE PICTURESQUE RAINY RIVER DISTRICT.

AN IDEAL SUMMER RESORT

Here is found everything that the nerve shattered inhabitants of cities need or desire; an ozone-laden air that fills the lungs, and stimulates like wine; clear cool days; the pungent odor of pine and fir; streams filled with trout; beautiful lakes, with endless stretches of islands, like the links of a broken chain; a vast solitude that soothes like a caress; and quiet villages on the verge of the forest, where peace rests like a benediction over all.

Here one may tramp or canoe for days and weeks, encountering naught but the wild things of nature; sleep an Balsam boughs beneath the stars, and wake with the odor of moss and leaves in his nostrils, absorbing into his body and soul the life and power of the wilderness.

THE PICTURESQUE RAINY RIVER DISTRICT.
AN IDEAL SUMMER RESORT.

To seekers of health or recreation, the Canadian Northern lines offer exceptional inducements.

No more ideal summer resort exists than that portion of New Ontario traversed by the main line of the Canadian Northern, from Port Arthur to Warroad, on the Lake of the Woods.

Nowhere on the Continent is there anything just like it. There is but one Rainy Lake; and but one Lake of the Woods.

The World's Purest and Softest Water

Chippewa Natural Spring Water

THE OPINION OF ONE OF COMPETENT AUTHORITY:

"This is the purest and softest Natural Water that I have ever examined, after examining hundreds of waters from various sources, and so far as I have any knowledge from the published analysis of other waters, there is no spring water known which equals it, either in organic purity or freedom from the presence of mineral constituents: its softness and purity are extraordinary. It is an ideal water for drinking purposes."

(Signed) CHAS. W. DREW, Ph.B., M.D.
Chemist to City of Minneapolis.

LOUISE BRIDGE WINNIPEG, MAN.

THIS ROOFING is composed of wool, shielded on both sides with mica scales, which makes it impervious to dampness, and is otherwise a non-conductor. It is manufactured in Canada especially to withstand the severe frost contraction of our climate. The ROOFING has maintained its reliability in this respect effectually for the last 15 years, which no other roofing can boast of, and no complaint has ever been made against it by anyone in the country or city. With proper care—coating the felting every 5 years—it will last as long as any building stands, as it cannot decay. The ALL-WOOL MICA ROOFING has received many first-class testimonials, among others,

JAS. RYAN,
MCILAREN BROS., Brunswick Hotel,
BLACKWOOD Bros.,
D. SMITH, Exhibition Buildings,
I. WOODMAN, Engineer,
THE BOARD OF UNDERWRITERS,
D. E. SPRAGUE, Lumber Merchant,

VISITORS TO THE CITY

should not fail to see the Greenhouses before leaving. The slight, winter or summer, will repay the time spent. Visitors are always welcome, whether wishing to purchase or not, and we take pleasure in showing you through. Our City Greenhouses are right in the heart of the city, and our Nursery and Supply Greenhouses are only two miles from the City Hall. You cannot spend your time better than seeing our Greenhouses. A general sight—**PRICE**.
